

Prakash Vishwakarma

Software Engineer | 3+ Years Of Experience

prakash.official.dev@gmail.com +91-6232749876 [Linkedin](#) [GitHub](#) [Portfolio](#)

Technical Skills

Backend : Django, DRF, Laravel, PHP, Python, Redis, REST APIs
Frontend : ReactJS, Angular, HTML, CSS, Javascript, TypeScript, NextJS, Tailwind css, WordPress
Databases: MySQL, MongoDB, PostgreSQL
Miscellaneous: Docker, Figma, Git, GitHub, Bitbucket, CI/CD

Work Experience

Sygence Pvt. Ltd January - 2025 TO Present
Software Engineer

Project Links - [Customer](#) [Supplier](#) [Registration](#)

- Built and maintained a scalable multi-tenant architecture using Django, enabling seamless interaction between multiple customers and suppliers across tenants.
- Fixed a critical bug that prevented suppliers from viewing customer interactions—ensuring two-way communication and improving user satisfaction.
- Optimized Angular application performance, reducing initial load time and response time by over 30% through bundle splitting and code refactoring.
- Developed reusable Angular components and Django services, reducing code duplication and improving overall development speed.
- Mentored junior developers in Angular and Django best practices, improving team code quality and onboarding efficiency.
- Collaborated as a full-stack developer, integrating frontend Angular components with backend Django APIs to deliver end-to-end features.

ConstaCloud Pvt. Ltd December - 2023 TO August - 2024
FrontEnd Web Designer

Project Links - [TheCustomBakers](#) [Infraredsauna](#) [service.infraredsauna](#) [press.infraredsauna](#) [Prakashgarg](#)

- Built and maintained multiple client websites using Django, React, Angular and WordPress, with a strong focus on performance and responsive design.
- Transformed Figma designs into pixel-perfect, responsive web pages, ensuring design accuracy across all screen sizes.
- Collaborated directly with clients to understand UI requirements and deliver tailored design solutions, leading to improved client satisfaction and retention.
- Optimized website performance by implementing image compression, lazy loading, and efficient CSS structuring, reducing page load time by up to 35%.
- Developed SEO-friendly and accessible web pages, resulting in improved search visibility and user engagement.
- Successfully delivered Infrared Sauna websites, ensuring consistency across multiple subdomains with reusable WordPress components and responsive layouts.
- Worked across React, Angular and WordPress environments, showcasing adaptability in handling custom design and CMS-driven pages.

EVD Technology October - 2022 TO December - 2023
ReactJS Developer

Project Links - [ChhattisgarhHerbal](#) [VedaApp](#) [BastarTravels](#) [DeliverMyTune](#) [KhushiAdvertising](#) [Payngo](#)
[payngoadmin](#) [mynu](#)

- Designed and developed a complete e-commerce platform from scratch using Django, Laravel, ReactJS, Redux, and Tailwind CSS, resulting in a fully responsive and scalable shopping experience.
- Integrated Razorpay payment gateway for secure, seamless transactions and real-time order processing.
- Collaborated with backend and design teams to implement APIs and user-centric designs, ensuring smooth end-to-end functionality and UI consistency.
- Improved application performance by optimizing React components and reducing unnecessary re-renders, decreasing load times by over 25%.
- Implemented cross-device responsiveness and intuitive UI/UX improvements, increasing mobile user engagement.
- Managed version control using Git and GitHub, ensuring clean, trackable development across feature branches.
- Worked on bug fixing and manual/automated testing, reducing front-end issues by more than 40% post-release.
- Contributed to reusable component development, accelerating the development process across other internal projects.

Education
